# The Time Traveler

*Resident Healer Nicole Hernandez, also known as The Traveling Hypnotist, has curated a very special experience for Four Seasons Hotel New York Downtown - The Time Traveler.*

The Time Traveler is a past life regression elevated with healing rituals such as breath work and energetic clearing.

Past life regression is a hypnotherapy technique that helps people access memories, particularly those from another lifetime. A hypnotherapist assists clients through hypnosis or guided meditation, and then guides them to recall important details of past lives. During the session, the client experiences visualisations that are more vivid than a daydream and distinct from common dreams. The goal of a past life regression is to garner insight from past lives that can be helpful in this current lifetime.

The Time Traveler is offered as a four-hour experience and as an overnight immersive experience, allowing locals, staycationers and travellers to enjoy this impactful wellness treatment, based on their own personal preference.

## The Time Traveler experience includes the following:
